

Amendment to Specification

On page 5 of this instant application, please replace the fourth paragraph beginning at line 20 with the following amended paragraph:

- a) providing a Src protein (i.e. a Src encoding DNA under control of an expression element) and
- b) determining if a compound inhibits the activity of Src by measuring the activity of said Src protein in response to said candidate compound.

On page 6 of this instant application, please replace the third paragraph beginning at line 9 with the following amended paragraph:

- a) providing a sequence which regulates Src expression (i. e. a Src promoter sequence) and
- b) determining if a compound inhibits the activity of Src by measuring the activity of said Src protein in response to said candidate compound.
